City Partners with Alberta Environment to Clean Up Local Solvent Spill

August 22, 2017

(Wetaskiwin, Alberta) – A solvent spill occurred near the corner of 50 Avenue and 56 Street in Wetaskiwin on Saturday, August 19. The spill allowed approximately 1700 litres of solvent to be released into the storm system.

City crews responded quickly to contain the spill while the proper authorities were contacted to begin the clean-up process. The City of Wetaskiwin is working directly with Petro Canada and Alberta Environment & Parks to ensure the spill is contained and properly remediated.

Residents can expect to see activity around the spill route for approximately two months.
