

Municipal Census 2014

The City of Wetaskiwin Municipal Census began on May 1, 2014. The 2014 Census was the first municipally performed Census since 2009 and the first time that the City of Wetaskiwin used an electronic system for gathering the information directly from the residents.

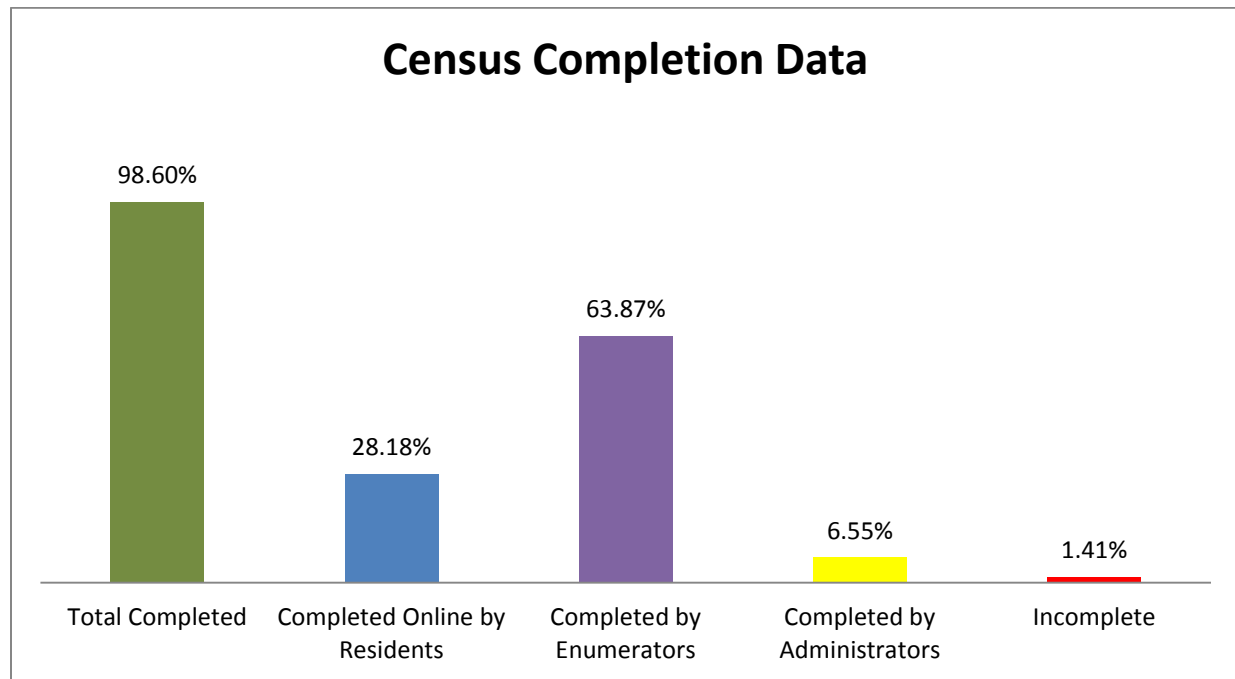

Online PIN numbers unique to each resident in the City were mailed out on May 8th with 8 door to door enumerator teams beginning on May 19th. Each home was asked three questions in the 2014 Census:

- Number of usual residents within the home
- Gender of each resident in the home
- An Age for each resident in the home (ranges provided – not specific age)

The results of the 2014 Municipal Census are as follow:

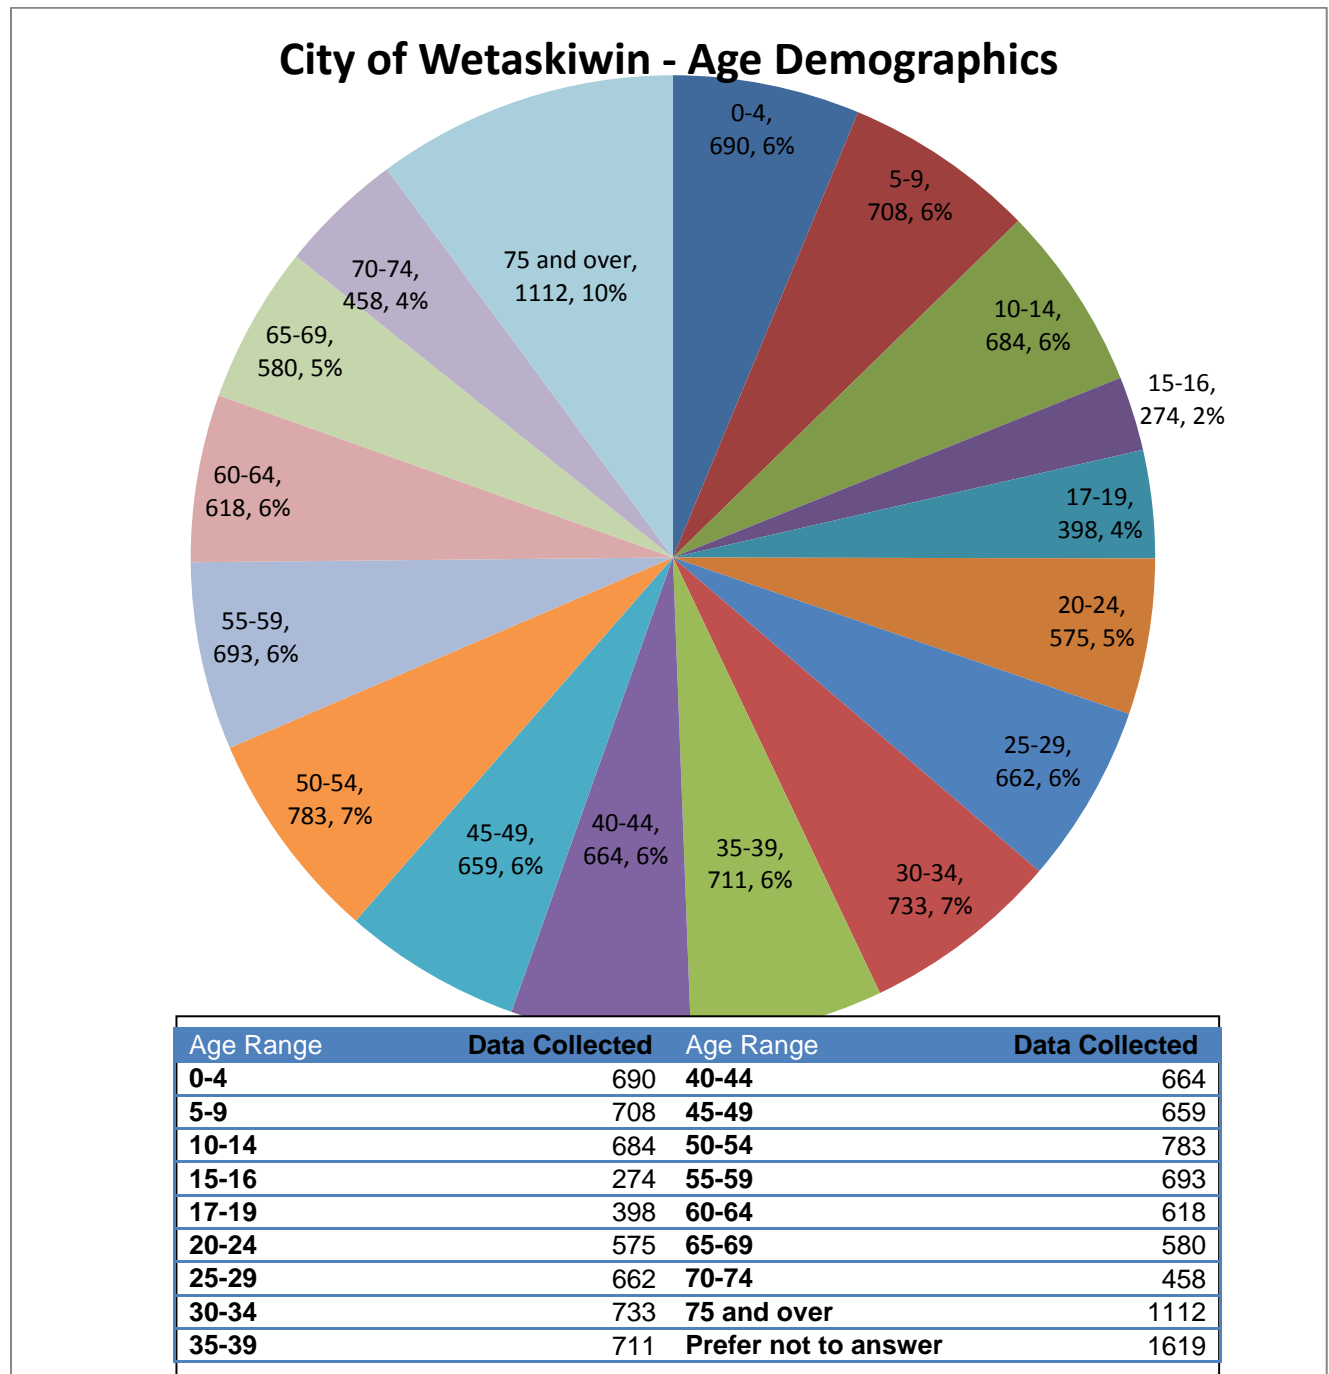

Total Number of Residences:	5895
Completed Addresses:	5812
Total Number of Residences unable to be contacted:	83
Percentage Complete:	98.6%
Number of Residences:	5812
Number of Addresses Vacant/Under Construction:	446

Total Population enumerated: 12,621

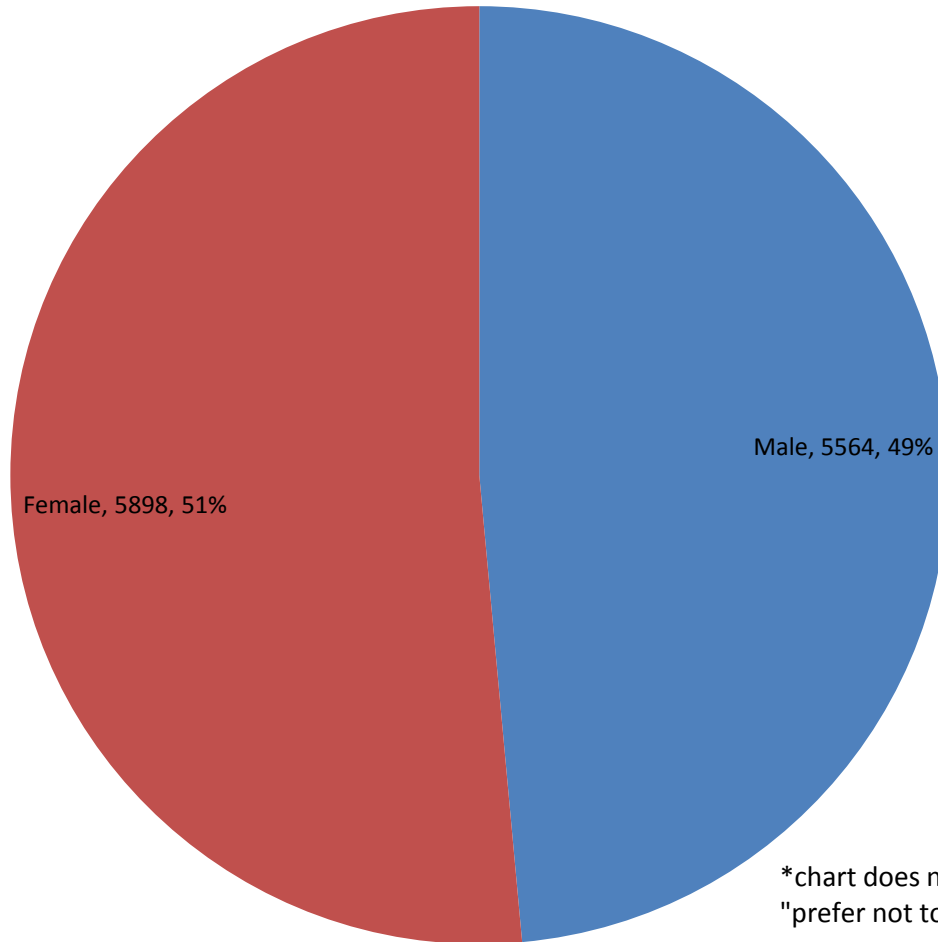

The most recent census data for the City of Wetaskiwin is from the 2011 Federal Census showing the City with a population of 12,525. This represents a reported increase of 1% per year since 2011. The total reported number in the 2014 Census is less than the actual population of the City due to some individual's refusal to participate. This is not uncommon and most municipalities are unable to achieve 100% reporting. Numerous attempts were made to contact the residences that were not reported. The Province of Alberta dictates when a Municipality may conduct a Census and all data reported was received by the June 30, 2014 deadline.

The following is a breakdown of the data received during the 2014 City of Wetaskiwin Municipal Census:
